~Waystar, Louisville KY July 2008-Jan 2019

QA Analyst Advanced, October 2015 to Jan 2019 Created and executed test suites for manual tests using MTM (Microsoft Test Manager). Identified and tracked defects, working with developers to correct bugs or missed requirements to ensure defect-free deployments to production. Performed functional, integration, end-to-end, security, regression, user acceptance and smoke testing of a wide variety of internal business and customer-facing desktop and web applications as well as testing of custom reports to ensure valid data and requirements met.

Project Specialist, October 2013 to October 2015 Defect Specialist – Gatekeeper of all things defects for all the company's products and applications. Lead weekly/monthly meetings with multiple departments. Collected, analyzed and created reports and control charts on defect case data (number created/rejected/status/etc). Presented findings to the Director and VP of Operations each week. Created a process used by all of Operations for the handling of defects. Received Green Belt Certification in Six Sigma and worked on a project that simplified the defect process by reducing the number of child cases attached to defects.

Org Readiness Specialist, January 2013 to October 2013 Ensured seamless trouble-free transition for all clients newly subscribing to our suite of remits products. Worked closely with clients to understand any custom requirements and was the liaison responsible for effectively communicating any such requirements to Tech and Ops. Created and implemented training documents throughout multiple departments for multiple projects. Assisted other departments (non-technical) on calls with technical partners. Lead feedback groups for new products in beta mode and relayed that information to technology teams. Weekly updates with VP of Operations on status of all open/ending projects.
